

SAFETY DATA SHEET

Revision: 4th June 2019 Version: 5.1

ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2015/830

GASOIL V3010a

SECTION 1: IDENTIFICATION OF THE SUBSTANCE/MIXTURE AND OF THE COMPANY/UNDERTAKING

1.1 Product identifier

Product Name Gas Oils (petroleum), light vacuum
Product Description V3010-GASOIL-Gas Oils (petroleum), light vacuum
Trade Name GASOIL
Product code V3010, GASOIL
CAS No. 64741-58-8
EC No. 265-059-9
REACH Registration No. -

1.2 Relevant identified uses of the substance or mixture and uses advised against

Identified Use(s)

No.	Exposure Scenario	Page:
1	Distribution of Gas oils (petroleum), light vacuum	11
2	Formulation and (re)packing of Gas oils (petroleum), light vacuum	14
3	Use as a fuel - Industrial	17
4	Use as a fuel - Professional	20
5	Use as a fuel - Consumer	23

Uses Advised Against

Anything other than the above.

1.3 Details of the supplier of the safety data sheet

Company Identification

Vitol SA
Place des Bergues 3
P.O. Box 2056
1211 Geneva 1
Switzerland

Telephone

+31 10 498 7200

Fax

+31 10 452 9545

E-Mail (competent person)

xreach@vitol.com

1.4 Emergency telephone number

Emergency Phone No.

+44 (0) 1235 239 670, 24/7

Languages spoken

All official European languages.

SECTION 2: HAZARDS IDENTIFICATION

2.1 Classification of the substance or mixture

2.1.1 Regulation (EC) No. 1272/2008 (CLP)

Flam. Liq. 3; H226
Asp. Tox. 1; H304
Skin Irrit. 2; H315
Acute Tox. 4; H332
Carc. 2; H351
STOT RE 2; H373 (Thymus, Liver, Bone marrow)
Aquatic Chronic 2; H411

2.2 Label elements

Product Description

According to Regulation (EC) No. 1272/2008 (CLP)
V3010-GASOIL-Gas Oils (petroleum), light vacuum

Hazard Pictogram(s)

Signal Word(s)

Danger

SAFETY DATA SHEET

Revision: 4th June 2019 Version: 5.1

ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2015/830

GASOIL V3010a

Hazard Statement(s) H226: Flammable liquid and vapour.
H304: May be fatal if swallowed and enters airways.
H315: Causes skin irritation.
H332: Harmful if inhaled.
H351: Suspected of causing cancer.
H373: May cause damage to organs through prolonged or repeated exposure:
Thymus, Liver, Bone marrow
H411: Toxic to aquatic life with long lasting effects.

Precautionary Statement(s) P210: Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.
P260: Do not breathe fume.
P280: Wear protective gloves/protective clothing/eye protection/face protection.
P301+P310: IF SWALLOWED: Immediately call a POISON CENTER or doctor/physician.
P331: Do NOT induce vomiting.
P273: Avoid release to the environment.

2.3 Other hazards May form explosive mixture with air. The vapour is heavier than air; beware of pits and confined spaces. May cause irritation to eyes and air passages. Product may release Hydrogen Sulphide: A specific assessment of inhalation risks from the presence of hydrogen sulphide in tank headspaces, confined spaces, product residue, tank waste and waste water, and unintentional releases should be made to help determine controls appropriate to local circumstances.

SECTION 3: COMPOSITION/INFORMATION ON INGREDIENTS

3.1 Substances

SUBSTANCE	CAS No.	EC No.	%W/W
Gas oils (petroleum), light vacuum	64741-58-8	265-059-9	100

SECTION 4: FIRST AID MEASURES

4.1 Description of first aid measures

Self-protection of the first aider Eliminate sources of ignition. If it is suspected that fumes are still present, the responder should wear an appropriate mask or self-contained breathing apparatus. Drench contaminated clothing with water before removing to avoid risk of sparks from static electricity. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Avoid all contact. Do not ingest. If swallowed then seek immediate medical assistance.

H2S Warning: Hydrogen sulphide (H₂S) can accumulate in the headspace of storage tanks and reach potentially hazardous concentrations. If there is any suspicion of inhalation: A self contained breathing apparatus should be worn. Remove to fresh air immediately.

Inhalation IF INHALED: If breathing is difficult, remove victim to fresh air and keep at rest in a position comfortable for breathing. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. Call a POISON CENTER/doctor if you feel unwell.

Skin Contact IF ON SKIN (or hair): Remove contaminated clothing immediately and wash affected skin with plenty of water or soap and water. If irritation (redness, rash, blistering) develops, get medical attention.

Eye Contact IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists, get medical advice/attention.

Ingestion IF SWALLOWED: Do not induce vomiting because of risk of aspiration into the

SAFETY DATA SHEET

Revision: 4th June 2019 Version: 5.1

ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2015/830

GASOIL V3010a

4.2	Most important symptoms and effects, both acute and delayed	lungs. If vomiting occurs spontaneously, keep head below hips to prevent aspiration into the lungs. If unconscious, place in recovery position and get medical attention immediately. Do not give anything by mouth to an unconscious person. Get medical attention immediately. Do not wait for symptoms to appear. Inhalation: Irritation of the respiratory tract. Skin Contact: Causes skin irritation. Ingestion: Aspiration into the lungs may cause chemical pneumonitis, which can be fatal. Ingestion may cause irritation of the gastrointestinal tract. Nausea, Vomiting and Diarrhoea.
4.3	Indication of any immediate medical attention and special treatment needed Notes to a physician:	Treat symptomatically. IF INHALED: If unconscious, place in recovery position and get medical attention immediately. Administer oxygen if available and artificial respiration if necessary. IF SWALLOWED: Do not induce vomiting because of risk of aspiration into the lungs. If aspiration is suspected obtain immediate medical attention. If vomiting occurs spontaneously, keep head below hips to prevent aspiration into the lungs.

SECTION 5: FIREFIGHTING MEASURES

5.1	Extinguishing media Suitable Extinguishing media	Extinguish with sand or dry chemical. Foam, Carbon dioxide, Water fog or dry powder
	Unsuitable extinguishing media	Do not use water jet. Direct water jet may spread the fire.
5.2	Special hazards arising from the substance or mixture	Flammable liquid and vapour. Will float and can be reignited on surface water. Decomposes in a fire giving off toxic fumes: A mixture of solid and liquid particulates and gases including unidentified organic and inorganic compounds. May form explosive mixture with air. Prevent liquid entering sewers, basements and any watercourses. Vapours are heavier than air and may travel considerable distances to a source of ignition and flashback. If sulphur compounds are present in appreciable amounts, combustion products may include also H ₂ S and SO _x (sulfur oxides) or sulfuric acid
5.3	Advice for fire-fighters	Fight fire with normal precautions from a reasonable distance. Fire fighters should wear complete protective clothing including self-contained breathing apparatus. Keep containers cool by spraying with water if exposed to fire. Avoid release to the environment. Dike fire control water for later disposal.

SECTION 6: ACCIDENTAL RELEASE MEASURES

6.1	Personal precautions, protective equipment and emergency procedures	Caution - spillages may be slippery. Ensure operatives are trained to minimise exposures. Ensure suitable personal protection during removal of spillages. Eliminate sources of ignition. Shut off leaks if without risk. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Avoid all contact with substance. Ensure adequate ventilation. Do not breathe vapour. Do not ingest. If swallowed then seek immediate medical assistance. Do not use sparking tools. Use non-sparking ventilation systems, approved explosion-proof equipment, and intrinsically safe electrical systems.
	H ₂ S Warning:	Product may release Hydrogen Sulphide. Exposure controls - These controls may include: Segregation of areas, Access only to authorised persons, Permit to work systems, Confined space working procedures, Area H ₂ S alarms, Personal H ₂ S alarms, Personal escape sets, H ₂ S awareness training. Please see section 8 for appropriate personal protection equipment
	Small spillages:	Wear flame-resistant antistatic protective clothing.
	Large spillages:	Evacuate the area and keep personnel upwind. Drench contaminated clothing with water before removing to avoid risk of sparks from static electricity. Avoid all contact. Wear chemical protection suit and breathing apparatus. See Also Section: 8.
6.2	Environmental precautions	Avoid release to the environment. Do not allow to enter drains, sewers or watercourses. Spillages or uncontrolled discharges into watercourses must be alerted to the Environment Agency or other appropriate regulatory body. If necessary: Dike area to contain the spill and prevent releases to sewers, drains,

SAFETY DATA SHEET

Revision: 4th June 2019 Version: 5.1

ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2015/830

GASOIL V3010a

6.3	Methods and material for containment and cleaning up	or other waterways. Provided it is safe to do so, isolate the source of the leak. Use non-sparking equipment when picking up flammable spill. The vapour is heavier than air; beware of pits and confined spaces. Ensure that the equipment is adequately grounded. Allow small spillages to evaporate provided there is adequate ventilation. Wear flame-resistant antistatic protective clothing. Wear chemical protection suit and breathing apparatus.
	Spillages onto land:	In case of soil contamination, remove contaminated soil and treat in accordance with local regulations. Adsorb spillages onto sand, earth or any suitable adsorbent material. Transfer to a lidded container for disposal or recovery. Dispose of this material and its container as hazardous waste. Small spillages: Allow small spillages to evaporate provided there is adequate ventilation. Wear flame-resistant antistatic protective clothing. Large spillages: Cover spillage with foam to reduce evaporation. Do not use water jet.
	Spillages on water or at sea:	Collect as much as possible in clean container for reuse or disposal. Small spillages: Contain product with floating barriers or other equipment. Collect spilled product by absorbing with specific floating absorbents. Large spillages: Open waters should be contained with floating barriers or other mechanical means and recovered, only if this is strictly necessary and if fire/explosion risks can be adequately prevented. Otherwise control the spreading of the spillage, and let the substance evaporate naturally.
6.4	Reference to other sections	See Section: 8,13

SECTION 7: HANDLING AND STORAGE

7.1	Precautions for safe handling	Keep away from sources of ignition - No smoking. Use only outdoors or in a well-ventilated area. Prevent vapour build up by providing adequate ventilation during and after use. May form explosive mixtures with air. Take action to prevent static discharges. Use non-sparking tools. All parts of the plant and equipment should be electrically bonded together and connected to earth. Electrical continuity should be checked at regular intervals. Antistatic clothing and footwear should be used. The vapour is heavier than air; beware of pits and confined spaces. Avoid all contact with substance. Do not ingest. If swallowed then seek immediate medical assistance. Do not breathe vapour. See Section: 8. Keep good industrial hygiene. Wash hands thoroughly after handling. Contaminated clothing should be thoroughly cleaned.
	H2S Warning:	Product may release Hydrogen Sulphide: A specific assessment of inhalation risks from the presence of hydrogen sulphide in tank headspaces, confined spaces, product residue, tank waste and waste water, and unintentional releases should be made to help determine controls appropriate to local circumstances. These controls may include: Segregation of areas, Access only to authorised persons, Permit to work systems, Confined space working procedures, Area H2S alarms, Personal H2S alarms, Personal escape sets, H2S awareness training.
7.2	Conditions for safe storage, including any incompatibilities	Light hydrocarbon vapours can build up in the headspace of containers. These can cause flammability / explosion hazards. Bund storage facilities to prevent soil and water pollution in the event of spillage. Keep only in original packaging. Keep containers properly sealed when not in use. Protect from sunlight. Containers of this material may be hazardous when empty since they retain product residue. Empty container may contain product residue which may result in flammable or explosive vapours inside the container.
	Storage temperature	Stable at ambient temperatures.
	Storage measures	Suitable containers: Stainless steel, Mild steel
	Incompatible materials	Do not store in: Synthetic materials
7.3	Specific end use(s)	Keep away from oxidising agents. See Section: 1.2 and/or Exposure Scenario.

SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

8.1	Control parameters	
8.1.1	Occupational Exposure Limits	No Occupational Exposure Limit assigned. Users are advised to consider

SAFETY DATA SHEET

Revision: 4th June 2019 Version: 5.1

ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2015/830

GASOIL V3010a

national Occupational Exposure Limits or other equivalent values.

8.1.2 Biological limit value

Not established.

8.1.3 PNECs and DNELs

PNEC: Not established. Gas Oils (petroleum), light vacuum is a hydrocarbon UVCB. The hydrocarbon block method is used in PETRORISK to calculate the environmental toxicity (HC5) of each group of components in the substance. These are used to estimate the environmental risk for the substance. Therefore individual environmental compartments PNECs are not available for this product.

Gasoline Derived No Effect Level	Oral	Inhalation	Dermal
Worker - Long Term - Systemic effects	-	68.3 mg/m ³	2.9 mg/kg bw/day
Worker - Acute - Systemic effects	-	4300 mg/m ³	-
Consumer - Long Term - Systemic effects	1.3 mg/kg bw/day	20 mg/m ³	1.3 mg/kg bw/day
Consumer - Acute - Systemic effects	-	2600 mg/m ³	-

8.2 Exposure controls

8.2.1 Appropriate engineering controls

Provide adequate ventilation, including appropriate local extraction if dusts, fumes or vapours are likely to be evolved. Store in a cool/low-temperature, well-ventilated (dry) place away from heat and ignition sources. Guarantee that the eye flushing systems and safety showers are located close to the working place.

8.2.2 Individual protection measures, such as personal protective equipment (PPE)

Protective clothing should be selected specifically for the working place, depending on concentration and quantity of the hazardous substances handled. The resistance of the protective clothing to chemicals should be ascertained with the respective supplier.

Fuels are typically used, transferred and transported in closed systems. If exposure is likely (i.e. during sampling) the following advice may be appropriate. Keep good industrial hygiene. Always wash hands before smoking, eating and drinking. Do not eat, drink or smoke at the work place.

Refer to annexes for exposure scenarios detailing use specific exposure controls

Eye/ face protection

Use eye protection according to EN 166, designed to protect against liquid splashes.

Skin protection

Hand protection: Wear impervious gloves (EN374). Gloves should be changed regularly to avoid permeation problems. Breakthrough time of the glove material: refer to the information provided by the gloves' producer. Recommended: Nitrile rubber.

Body protection: Wear anti-static clothing and shoes.
small scale: Wear suitable coveralls to prevent exposure to the skin.
large scale: Chemical protection suit.

Respiratory protection

When the product is heated /In case of inadequate ventilation wear respiratory protection. The use of a high efficiency filter (EN143) is recommended. Filter type A1

Closed system(s): Not normally required.

Thermal hazards

Not applicable.

8.2.3 Environmental Exposure Controls

Avoid release to the environment.

SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES

9.1 Information on basic physical and chemical properties

SAFETY DATA SHEET

Revision: 4th June 2019 Version: 5.1

ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2015/830

GASOIL V3010a

Appearance	Liquid. May be coloured.
Odour	Diesel Odour
Odour threshold	Not established.
pH	Not established.
Melting point/freezing point	- 40 °C - + 6 °C
Initial boiling point and boiling range	141 – 462 °C @ 101 kPa
Flash point	> 56 °C @ 101 kPa
Evaporation rate	Not established.
Flammability (solid, gas)	Not applicable - Liquid
Upper/lower flammability or explosive limits	Not established.
Vapour pressure	0.5 kPa @ 20°C
Vapour density	Not established.
Relative density	0.90 – 0.92 g/cm ³ @ 15 °C
Solubility(ies)	Immiscible with water.
Partition coefficient: n-octanol/water	Not established.
Auto-ignition temperature	> 225 °C @ 101 kPa
Decomposition Temperature	Not established.
Viscosity	≥ 1.5 mm ² /s @ 40 °C
Explosive properties	Not explosive. (Vapour may create explosive atmosphere.)
Oxidising properties	Not oxidising.

9.2 Other information None known.

SECTION 10: STABILITY AND REACTIVITY

10.1 Reactivity	Stable under normal conditions. Reacts with - Strong oxidising agents
10.2 Chemical stability	Stable under normal conditions. Hazardous polymerisation will not occur. Product may release Hydrogen Sulphide.
10.3 Possibility of hazardous reactions	Flammable liquid and vapour. May form explosive mixture with air. Vapours are heavier than air and may travel considerable distances to a source of ignition and flashback. Product may release Hydrogen Sulphide.
10.4 Conditions to avoid	Elevated temperature. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Keep away from direct sunlight.
10.5 Incompatible materials	Keep away from oxidising agents. Strong Acids and Alkalis.
10.6 Hazardous decomposition product(s)	A mixture of solid and liquid particulates and gases including unidentified organic and inorganic compounds. Decomposes in a fire giving off toxic fumes: COx, H ₂ S, SO _x ,

SECTION 11: TOXICOLOGICAL INFORMATION

11.1 Information on toxicological effects	All test data taken from existing ECHA registrations for the substances mentioned.
Acute toxicity - Ingestion	Based upon the available data, the classification criteria are not met. LD50 > 5000 mg/kg bw/day (rat) (OECD 401)
Acute toxicity - Inhalation	Acute Tox. 4; Harmful if inhaled. LC50 Vapour 4.11 mg/l Air (rat) (OECD 403)
Acute toxicity - Skin Contact	Based upon the available data, the classification criteria are not met. LD50 > 2000 mg/kg bw/day (rabbit) (OECD 434)
Skin corrosion/irritation	Skin Irrit. 2; Causes skin irritation. Irritating to skin. (rabbit) (OECD 404)
Serious eye damage/irritation	Based upon the available data, the classification criteria are not met. Not irritating to eyes (rabbit) (OECD 405)
Respiratory or skin sensitization	Based upon the available data, the classification criteria are not met. Sensitisation (guinea pig) - Negative (OECD 406)
Germ cell mutagenicity	Based upon the available data, the classification criteria are not met. In vitro: Negative (OECD 476) In vivo: Negative (mouse) (OECD 474)
Carcinogenicity	Carc. 2; Suspected of causing cancer. ECHA Registration Endpoint summary: According to EU CLP Classification (EC no. 1272/2008), VGO/Hydrocracked/Distillate fuels are classified for this endpoint.
Reproductive toxicity	Based upon the available data, the classification criteria are not met.

SAFETY DATA SHEET

Revision: 4th June 2019 Version: 5.1

ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2015/830

GASOIL V3010a

STOT - single exposure	Based upon the available data, the classification criteria are not met.
STOT - repeated exposure	STOT RE 2; May cause damage to organs through prolonged or repeated exposure: Thymus, Liver, Bone marrow
	Oral: No data
	Chronic - Systemic effects NOAEC 1710 mg/m ³
	Inhalation: No adverse effect observed (rat)
	Acute - Local effects NOAEC 880 mg/m ³
	Adverse effects observed (rat) (OECD 413)
	Acute - Local effects NOAEL 30 mg/kg bw/day
	Dermal: Adverse effects observed (rat) (OECD 411)
Aspiration hazard	Asp. Tox. 1; May be fatal if swallowed and enters airways.
	Viscosity: ≥ 1.5 mm ² /s @ 40 °C
11.2 Other information	None.

SECTION 12: ECOLOGICAL INFORMATION

12.1 Toxicity	Aquatic Chronic 2; Toxic to aquatic life with long lasting effects.
Short Term (acute):	LL50 (Fish) (96hr) 21 mg/l (OCED 203)
Long Term (Chronic):	The aquatic toxicity was estimated using the PETROTOX computer model.
	Estimated: NOEL (Fish) 0.083 mg/l
	Estimated: NOEL (Invertebrates) 0.2 mg/l
12.2 Persistence and degradability	Readily biodegradable. (OECD 301F)
12.3 Bioaccumulative potential	Substance is complex UVCB. Indirect exposure and resulting risk estimates predicted by PETRORISK are likely to be overestimated.
12.4 Mobility in soil	The product is predicted to have low mobility in soil. Immiscible with water.
12.5 Results of PBT and vPvB assessment	Substance is complex UVCB. This substance does not contain PBT constituents included in the SVHC candidate list at concentrations above 0.1%.
12.6 Other adverse effects	None known.

SECTION 13: DISPOSAL CONSIDERATIONS

13.1 Waste treatment methods	Dispose of this material and its container as hazardous waste. Do not empty into drains, dispose of this material and its container at hazardous or special waste collection point. Disposal should be in accordance with local, state or national legislation. Containers of this material may be hazardous when empty since they retain product residue. Containers must not be punctured or destroyed by burning, even when empty. Allocation of a waste code number, according to the European Waste Catalogue, should be carried out in agreement with the regional waste disposal company. Waste code: 13 07 01
-------------------------------------	---

SECTION 14: TRANSPORT INFORMATION

	ADR/RID	IMDG/ADN
14.1 UN number	UN 1202	UN 1202
14.2 Proper Shipping Name	GAS OIL	GAS OIL
14.3 Transport hazard class(es)	3	3 (N2, F)
14.4 Packing group	III	III
14.5 Environmental hazards	MILIEUGEVAARLIJK / ENVIRONMENTALLY HAZARDOUS/ UMWELTGEFÄHREND /DANGEREUX POUR/ L'ENVIRONNEMENT	
14.6 Special precautions for user	See Section: 2	
14.7 Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code	This product is being carried under the scope of MARPOL Annex 1. Special Precautions: Refer to Chapter 7 'Handling and Storage' for special precautions which a user needs to be aware of, or needs to comply with, in connection with transport.	
14.8 Additional Information	HIN: 30 Tunnel Code: 3 (D/E) Limited Quantity: 5L	EmS: F-E, S-E, F-A, S-F Limited Quantity: 5L

SECTION 15: REGULATORY INFORMATION

15.1 Safety, health and environmental
--

SAFETY DATA SHEET

Contributing Scenarios

Workers

PROC1	Use in closed process, no likelihood of exposure
PROC2	Use in closed, continuous process with occasional controlled exposure
PROC2 (Storage)	Use in closed, continuous process with occasional controlled exposure. Bulk product storage.
PROC3	Use in closed, continuous process with occasional exposure
PROC3 (Sampling)	Use in closed, continuous process with occasional exposure. Sample collection
PROC3 (Fuel additive)	Use in closed, continuous process with occasional exposure. Use as a fuel additive
PROC4	Use in batch and other process (synthesis) where opportunity for exposure arises
PROC5	Mixing or blending in batch processes for formulation of preparations and articles (multistage and/or significant contact).
PROC5 (Vapour)	Mixing or blending in batch processes for formulation of preparations and articles (multistage and/or significant contact). Substance in vapour phase.
PROC8a (Manual)	Transfer of substance or preparation (charging/discharging) from/to vessels/large containers at non-dedicated facilities Manual transfer/pouring from containers
PROC8a (Maintenance)	Transfer of substance or preparation (charging/discharging) from/to vessels/large containers at non-dedicated facilities Clean down and maintenance of vessels and containers.
PROC8b (Bulk)	Transfer of substance or preparation (charging/discharging) from/to vessels/large containers at dedicated facilities Bulk transfer in a closed system
PROC8b (Bulk closed loading)	Transfer of substance or preparation (charging/discharging) from/to vessels/large containers at dedicated facilities Bulk closed loading and unloading (e.g. road/rail car bottom loading, marine vessel/barge loading)
PROC8b (Bulk open loading)	Transfer of substance or preparation (charging/discharging) from/to vessels/large containers at dedicated facilities Bulk open loading (e.g. road/rail car top loading)
PROC8b (Drum)	Transfer of substance or preparation (charging/discharging) from/to vessels/large containers at dedicated facilities Drum or batch transfers.
PROC8b (Refueling)	Transfer of substance or preparation (charging/discharging) from/to vessels/large containers at dedicated facilities Refueling vehicles, light aircraft or marine craft
PROC9	Transfer of substance or preparation into small containers (dedicated filling line, including weighing)
PROC15	Use as laboratory reagent.
PROC16	Using material as fuel sources, limited exposure to unburned product to be expected.

Environment

ERC1	Manufacture of substance
ERC2	Formulation of preparations
ERC3	Formulation in materials
ERC4	Industrial use of processing aids in processes and products, not becoming part of articles
ERC5	Industrial use resulting in inclusion into or onto a matrix
ERC6a	Industrial use resulting in manufacture of another substance (use of intermediates)
ERC6b	Industrial use of reactive processing aids
ERC6c	Industrial use of monomers for manufacture of thermoplastics
ERC6d	Industrial use of process regulators for polymerisation processes in production of resins, rubbers, polymers

2.0 Operational conditions and risk management measures		
2.1 Control of worker exposure		
Product characteristics		
Physical form of product	Liquid With potential for aerosol generation	
Concentration of substance in product	Covers concentrations up to 100%	
Human factors not influenced by risk management		
Potential exposure area	Not defined	
Frequency and duration of use		
Exposure duration per day	Covers daily exposures up to 8 hours (unless stated differently).	
Frequency of use (days per year)	300	
Other operational conditions affecting worker exposure		
Location of use (Indoor/Outdoor)	Not defined	
Characteristics of the surroundings	Not defined	
Assumes use at not more than 20°C above ambient temperature, unless stated differently. Assumes a good basic standard of occupational hygiene is implemented. Avoid direct skin contact with product. Identify potential areas for indirect skin contact. Wear gloves (tested to EN374) if hand contact with substance likely. Clean up contamination/spills as soon as they occur. Wash off any skin contamination immediately. Provide basic employee training to prevent/minimise exposures and to report any skin problems that may develop.		
Technical conditions of use		
PROC1, PROC2, PROC2 (Storage), PROC3, PROC8b (Bulk)	Handle substance within a closed system.	
Organisational measures		
PROC8a (Maintenance)	Drain down and flush system prior to equipment break-in or maintenance. (Inhalation - efficiency of at least 80 %)	
Risk management measures related to human health		
Respiratory protection	No special measures are required.	
Hand and/or Skin protection	PROC4, PROC8b (Bulk), PROC8b (Bulk closed loading), PROC8b (Bulk open loading), PROC9	Wear suitable gloves tested to EN374. (Efficiency of at least 80 %)
	PROC8a (Maintenance)	Wear chemically resistant gloves (tested to EN374) in combination with 'basic' employee training. (Efficiency of at least 90 %)
Eye Protection	No special measures are required.	
Other operational conditions affecting worker exposure		
Wear suitable gloves tested to EN374.		
Ensure material transfers are under containment or extract ventilation.		

SAFETY DATA SHEET

Revision: 4th June 2019 Version: 5.1

ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2015/830

GASOIL V3010a

Clear transfer lines prior to de-coupling.
 Clear spills immediately.
 Transfer via enclosed lines.
 Avoid dip sampling. (PROC3 (Sampling))
 Retain drain downs in sealed storage pending disposal or for subsequent recycle. Apply vessel entry procedures including use of forced supplied air.
 Wear suitable coveralls to prevent exposure to the skin. (PROC8a (Maintenance))
 Fill containers/cans at dedicated fill points supplied with local extract ventilation. (PROC9)
 Handle in a fume cupboard. (PROC15)

2.2 Control of environmental exposure

Amounts used

Fraction of EU tonnage used in region:	0.1
Regional use tonnage (tons/year):	9.6E+05
Fraction of Regional tonnage used locally: tons/year	2.0E-03
Annual site tonnage (tons/year):	1.9E+03
Average daily use (kg/day)	1.9E+04

Environment factors not influenced by risk management

Flow rate of receiving surface water (m ³ /d):	Not defined (default = 18,000)
Local freshwater dilution factor:	10
Local marine water dilution factor:	100

Operational conditions

Emission days (days/year):	100
Release fraction to air from process (initial release prior to RMM):	1.0E-04
Release fraction to wastewater from process (initial release prior to RMM):	1.0E-07
Release fraction to soil from process (initial release prior to RMM):	1.0E-05

Technical onsite conditions and measures to reduce or limit discharges, air emissions and releases to soil

Treat air emission to provide a typical removal efficiency of (%):	90
Treat onsite wastewater (prior to receiving water discharge) to provide the required removal efficiency of (%):	0
Treat soil emission to provide a typical removal efficiency of (%):	Not defined
Common practices vary across sites thus conservative process release estimates used. If discharging to domestic sewage treatment plant, no onsite wastewater treatment required.	

Organisational measures to prevent/limit release from site

Prevent discharge of undissolved substance to or recover from onsite wastewater. Do not apply industrial sludge to natural soils. Sludge should be incinerated, contained or reclaimed.

Conditions and measures related to municipal sewage treatment plant

Size of municipal sewage system/treatment plant (m ³ /d)	2000
Degradation effectiveness (%)	88.2

Conditions and measures related to external treatment of waste for disposal

This substance is consumed during use and no waste of the substance is generated.

Substance release quantities after risk management measures

Maximum allowable site tonnage (MSafe) based on release following total wastewater treatment removal (kg/d):	9.6E+04
--	---------

3.2 Environmental exposure prediction

Exposure assessment (method/calculation model) The Hydrocarbon Block Method has been used to calculate environmental exposure with the Petrorisk model.

Gas oils (petroleum), light vacuum is a hydrocarbon UVCB. The hydrocarbon block method is used in PETRORISK to calculate the environmental toxicity (HC5) of each group of components in the substance. These are used to estimate the environmental risk for the substance. Therefore individual environmental compartments PNECs are not available for this product.

Environmental exposure	STP	freshwater	marine water	Soil	freshwater sediment	marine sediment
Predicted Environmental Exposure (PEC)	1.2E-04 mg/l	1.2E-05 mg/l	1.2E-06 mg/l	0.1	0.8	0.021
Risk characterisation ratio (RCR)	1.5E-03	5.1E-03	5.1E-04	2.8E-05	8.6E-03	6.3E-04

Human exposure prediction:

Route of Exposure	Exposure ($\mu\text{g}/\text{kg}^{-1} \text{ day}^{-1}$)	Risk characterisation ratio (RCR)
Oral	21	0.016
Inhalation	0.027	4.8E-06

4.0 Evaluation guidance to downstream user

For scaling see	Where other Risk Management Measures/Operational Conditions are adopted, then users should ensure that risks are managed to at least equivalent levels. Available hazard data do not support the need for a DNEL to be established for other health effects. Further details on scaling and control technologies are provided in SpERC factsheet (http://cefic.org/en/reach-for-industries-libraries.html).

Area of use	PROC16	Outdoor
	All other PROC's	Not defined (default = Indoor)
Characteristics of the surroundings	Not defined	
General measures applicable to all activities		
Assumes use at not more than 20°C above ambient temperature, unless stated differently. Assumes a good basic standard of occupational hygiene is implemented. Avoid direct skin contact with product. Identify potential areas for indirect skin contact. Wear gloves (tested to EN374) if hand contact with substance likely. Clean up contamination/spills as soon as they occur. Wash off any skin contamination immediately. Provide basic employee training to prevent/minimise exposures and to report any skin problems that may develop.		
Technical conditions of use		
PROC2 (Storage)	Handle substance within a closed system.	
PROC16	If operational measures are not practicable, Provide a good standard of general ventilation (not less than 3 to 5 air changes per hour). (Efficiency of at least 30 %)	
Organisational measures		
PROC8a (Maintenance)	Drain down and flush system prior to equipment break-in or maintenance.	
PROC8b (Drum)	Use drum pumps. (Efficiency of at least 80 %)	
Risk management measures related to human health		
Respiratory protection	No special measures are required.	
Hand and/or Skin protection	PROC8b (Bulk), PROC8b (Drum), PROC8b (Refueling)	Wear suitable gloves tested to EN374. (Efficiency of at least 80 %)
	PROC8a (Maintenance)	Wear chemically resistant gloves (tested to EN374) in combination with 'basic' employee training. (Efficiency of at least 90 %)
Eye Protection	No special measures are required.	
Other operational conditions affecting worker exposure		
Retain drain downs in sealed storage pending disposal or for subsequent recycle. Wear suitable coveralls to prevent exposure to the skin. Avoid spillage when withdrawing pump. Transfer via enclosed lines. Avoid dip sampling.		
2.2 Control of environmental exposure		
Amounts used		
Fraction of EU tonnage used in region:	0.1	

SAFETY DATA SHEET

Revision: 4th June 2019 Version: 5.1

ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2015/830

GASOIL V3010a

Regional use tonnage (tons/year):	3.4E+04
Fraction of Regional tonnage used locally: (tons/year)	5.0E-04
Annual site tonnage (tons/year):	17
Average daily use (kg/day):	47
Environment factors not influenced by risk management	
Flow rate of receiving surface water (m ³ /d):	Not defined (default = 18,000)
Local freshwater dilution factor:	10
Local marine water dilution factor:	100
Operational conditions	
Emission days (days/year):	365
Release fraction to air from process (initial release prior to RMM):	1.0E-04
Release fraction to wastewater from process (initial release prior to RMM):	1.0E-05
Release fraction to soil from process (initial release prior to RMM):	5.0E-05
Technical onsite conditions and measures to reduce or limit discharges, air emissions and releases to soil	
Treat air emission to provide a typical removal efficiency of (%):	Not applicable
Treat onsite wastewater (prior to receiving water discharge) to provide the required removal efficiency of (%):	0
Treat soil emission to provide a typical removal efficiency of (%):	0
Common practices vary across sites thus conservative process release estimates used. If discharging to domestic sewage treatment plant, no onsite wastewater treatment required.	
Organisational measures to prevent/limit release from site	
Do not apply industrial sludge to natural soils. Sludge should be incinerated, contained or reclaimed.	
Conditions and measures related to municipal sewage treatment plant	
Size of municipal sewage system/treatment plant (m ³ /d)	2000
Degradation effectiveness (%)	88.2
Conditions and measures related to external treatment of waste for disposal	
External treatment and disposal of waste should comply with applicable local and/or national regulations.	
Substance release quantities after risk management measures	
Maximum allowable site tonnage (MSafe) based on release following total wastewater treatment removal (kg/d):	2.9E+03

3. Exposure estimation and reference to its source

3.1 Human exposure prediction

Exposure assessment (method/calculation model) ECETOC TRA

Process category [PROC]	Inhalation		Dermal		Combined
	inhalation exposure (mg/m ³)	Risk characterisation ratio (RCR)	dermal exposure (mg/kg bw/day)	Risk characterisation ratio (RCR)	Risk characterisation ratio (RCR)

3.2 Environmental exposure prediction

Exposure assessment (method/calculation model) The Hydrocarbon Block Method has been used to calculate environmental exposure with the Petrorisk model.

SAFETY DATA SHEET

Revision: 4th June 2019 Version: 5.1

ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2015/830

GASOIL V3010a

Gas oils (petroleum), light vacuum is a hydrocarbon UVCB. The hydrocarbon block method is used in PETRORISK to calculate the environmental toxicity (HC5) of each group of components in the substance. These are used to estimate the environmental risk for the substance. Therefore individual environmental compartments PNECs are not available for this product.

Environmental exposure	STP	freshwater	marine water	Soil	freshwater sediment	marine sediment
Predicted Environmental Exposure (PEC)	2.9E-05 mg/L	8.4E-06 mg/L	2.9E-07 mg/L	0.1 mg/kg ww	0.79 mg/kg ww	0.02 mg/kg ww
Risk characterisation ratio (RCR)	3.7E-04	4.2E-03	1.2E-04	8.0E-04	4.2E-03	1.8E-04

Human exposure prediction:

Route of Exposure	Exposure ($\mu\text{g}/\text{kg}^{-1} \text{ day}^{-1}$)	Risk characterisation ratio (RCR)
Oral	21	0.016
Inhalation	0.023	4.0E-06

4.0 Evaluation guidance to downstream user

<i>For scaling see</i>	Where other Risk Management Measures/Operational Conditions are adopted, then users should ensure that risks are managed to at least equivalent levels. Available hazard data do not support the need for a DNEL to be established for other health effects. Further details on scaling and control technologies are provided in SpERC factsheet (http://cefic.org/en/reach-for-industries-libraries.html).
